

ANVITEK

IT SECURITY SYSTEM

COMPANY PROFILE

ABOUT US

ANVITEK is a group of professionals from IT & security industry with its base in Calicut. We aim at providing its clients with most innovative, reliable and latest technologies in fields of IT security Software and ELV Systems.

The company's founders are qualified and experienced professionals in the field of electronic security and IT renowned in the domestic and middle-east markets. ANVITEK was established to benefit the end user with optimum design, giving them value for money. We are dedicated to build positive relationships with our customers by understanding their business needs and provide them with the most professional and highest level of quality and services they expect.

OUR VISION

To be the Services and Systems Integrator of Choice for Customers, Business partners, Employees and Investors.

OUR MISSION

To offer you the highest peace of mind protection by providing exceptional service, quality products and state-of-the-art technology to maximize your satisfaction and obtain your trust.

WHY WE ARE THE BEST

"ANVITEK IT Security System" is the right choice for you.
Here are some reasons.

COMPETENCE

Our highly experienced team with vast technological expertise is fully equipped to deliver perfect solutions for all your requirements.

COMMITMENT

Our dedicated and professionally skilled team works relentlessly to ensure error-free and timely delivery of solutions to our clients.

CLIENT ORIENTATION

With Client-First approach; all our efforts are aimed towards creating winning solutions for our clients, even if that calls for going an extra mile.

CLIENT SATISFACTION

For us Client satisfaction is supreme; we take full ownership and responsibility to offer you more value for your money and keep you ahead of your competition.

WHAT WE DO

ANVITEK provides key services to assist our clients through the entire life cycle of the physical & electronic security installations.

CONSULTANCY

Our technical and business experts are capable of congregating, recognizing, understanding and scrutinizing your requirements in any form and drafting them into right documentation which can be provided as a RFP or Technical Analysis Briefing. We encourage and expect feedbacks from our clientele and our foolproof analysis study will aid you to the right service or solutions provider which will rightly fulfill your business objectives.

DESIGN

Our design teams are happy to blow their heads and are able to provide top grade technology services by coming up with customized solutions matching your requirements. We take the assistance of advanced, top quality, trust worthy & cost-effective technology to bring in the perfect ICT/ELV design in front of your table.

PROJECT MANAGEMENT

ANVITEK specialist team is committed in serving our clientele with perfect solutions at the perfect time by planning, organizing, securing, managing, leading, and controlling resources. Our Project Managers can handle project scheduling, budgeting and coordinate themselves and with the help of software and PM applications to achieve specific goals.

IMPLEMENTATION

We have professional experience in implementing solutions for various commercial and noncommercial establishments.

Our expert engineers/technicians are able to effectively schedule and deploy best practice solutions are implemented without affecting the aesthetics of the building, ensuring completion within the stipulated time period and budget.

SYSTEM INTEGRATION

ANVITEK is specialized in creating an integrated functionality with a new or existing system. Our experts provide network operating and management systems customer oriented services which results in improved product quality, performance, reducing operational costs and improving response time.

SYSTEM MAINTENANCE

We never leave our clients in the middle of nowhere and clearly understand the importance of after sales service and support. We are only a call away from you and also provide an out-and-out maintenance package to ensure that your system keeps running without compromising on the safety and security of our customer's premises and properties.

TRAINING

ANVITEK training modules are tailor made to achieve specific goals of improving capability, capacity, productivity and performance of the system solutions. We provide trainings on ELV, Security, PA systems, Networking, etc. Our expert trainers also helps to maintain, update and upgrade skills which contributes to one's professional development.

SOURCING

"Do what you do best and outsource the rest"

We support tactical models like project based, staff augmentation and expertise which are not available in-house. Outsourcing helps to control business expenses, improve company focus, gain access to top class external services, divert internal resources for important tasks and streamlining energy for time consuming functions.

A man in a dark suit and white shirt is pointing his right index finger at a large, glowing blue shield icon. The shield has a keyhole in the center. Surrounding the shield are various other security-related icons, including a padlock, a camera, a globe, and a network diagram. The background is a dark, blurred cityscape at night.
